

Interstar Technologies Attains Top-Level "3Com® Approved" Status

Interstar's XMediusFAX® T.38 Fax Over IP Server Solutions Certified by 3Com for its Voice Solution Provider Program

Montreal, Canada, July 12, 2005

Interstar Technologies (www.faxserver.com), the world's leading developer of enterprise Internet Protocol (IP) fax solutions, has been certified by 3Com Corporation as a "**3ComApproved**" member of its Voice Solution Provider Program (VSPP). This certification follows extensive testing to ensure Interstar solutions are interoperable with 3Com enterprise IP telephony products and services.

3Com tested and approved Interstar's XMediusFAX® server product with the 3Com ® VCX™ IP telephony module and 3Com/AudioCodes' Mediant Digital and MP Analog VoIP gateways. More information at: <http://www.3com.com/voip/interstar.html>.

XMediusFAX was selected for the VSPP program based on its T.38 Fax over IP (FoIP) technology, which is the industry's first real-time IP fax solution that does not require use of a fax board. The solution enables users to have their faxes share a common inbox with email and voicemail.

"Through this certification process, we further enable our customers to realize the benefits of converged IP environment, helping to improve employee productivity and enhance customer interactions," said Pat Rudolph, 3Com vice president of technology sales. " By obtaining the 3Com approved status, enterprise customers are assured that their infrastructure is safe and reliable when they deploy an integrated 3Com IP telephony and Interstar XMediusFAX solution."

"This new relations exemplifies our commitment to be the market leader in FoIP, providing customers with solid and reliable IP fax solutions that are certified at the highest level to interoperate with the IP telephony technologies of today's market leaders such as 3Com," said Martin Demers, President and CEO of Interstar Technologies.

About XMediusFAX® and VoIP networks

About a decade ago, VoIP was introduced as a technology that would enable businesses to reap significant cost savings, while offering more features and capabilities, such as improved mobility. While VoIP has already accomplished that to a large degree, faxing in today's VoIP-enabled organizations still remains a legacy technology requiring POTS phone lines and extra hardware.

Interstar's XMediusFAX is the world's first boardless T.38 Fax Over IP solution. The technology connects directly to VoIP gateways, thereby eliminating the need for fax boards, phone lines, and specialized equipment. XMediusFAX integrates seamlessly with the leading IP telephony technologies of 3Com/AudioCodes, Cisco, and Alcatel, among others.

XMediusFAX is an essential component of unified messaging. Faxes can now share a common inbox, along with email and voicemail. Users can send and receive faxes directly from Microsoft Outlook, an SMTP email client, desktop application, or any T.37-compliant multifunction device (MFD). XMediusFAX, runs on Windows 2000 and 2003, and is available in Enterprise, Express and Service Provider (EE, X and SP) editions.

The award-winning XMediusFAX truly completes and delivers on the VoIP promise of improved features/functionality and increased productivity and ROI.

About Interstar Technologies

Privately-held Interstar Technologies pioneered the fax server revolution in 1996 with its LightningFAX® software. It then reinvented the fax server in 2002 with XMediusFAX®, the industry's first boardless, T.38 IP fax server solution for enterprises and service providers. With thousands of systems installed in more than 40 countries, Interstar is committed to providing world-class, electronic messaging technology to enterprise markets of all sizes, financial institutions, and governments.

Headquartered in Montreal, Canada, Interstar Technologies maintains partnerships with Cisco Systems, Groupe SAGEM, Bell Canada, 3Com, Eicon Networks, Microsoft, Pitney Bowes, IBM, HP, Lotus, SAP, Onset Technology, Brooktrout and Artisoft. Its award-winning solutions for Microsoft Windows are distributed worldwide through a global network of resellers, system integrators and OEM partners.
