Interstar Technologies Awarded "Best of Show" at INTERNET TELEPHONY® Conference & EXPO Miami 2005

XMediusFAX® SP boardless T.38 IP fax solution for service providers and large enterprises singled out for innovation and "killer app" quality at VoIP event attended by a record 6,200+ visitors

Montreal, QC , March 14, 2005

Interstar Technologies (www.faxserver.com), a leading developer of IP telephony technologies, announces that its XMediusFAX® SP solution has won a "Best of Show Award" at Technology Marketing Corporation (TMC®)'s INTERNET TELEPHONY Conference and EXPO Miami 2005. The XMediusFAX SP 4.6 multi-tenant IP fax server, recently launched at the TMC event, was also singled out as a Special Attraction at **Tehrani's IP Telephony Killer App Demo Days**T for its unique boardless and multi-tenant features.

"I chose Interstar's XMediusFax SP solution as one of my killer apps because I was impressed with the product's ability to partition fax servers to serve the needs of enterprise and service provider customers. Its support of multi-tenancy, T.38 and the ability to fax without boards made it a natural choice," said TMC President and Conference Chairman, Rich Tehrani. "Interstar and its innovative product XMediusFAX SP are a standout indication of why so many enterprise buyers, developers, resellers and service providers flock to INTERNET TELEPHONY® Conference & Expo."

"XMediusFAX SP has been successfully deployed by both service providers and large corporations such as TriWest Healthcare Alliance, which is under contract with the US Department of Defense to manage and administer the TRICARE program throughout 21 states in the Western US region," said Martin Demers, CEO of Interstar. "TriWest chose XMediusFAX because it is a cost-effective, secure, fault tolerant and highly-scalable solution that helps them comply with stringent governmental, regulatory and security requirements."

The Best of Show awards are presented to companies unveiling the most impressive new products or new releases at the event. A full list of the

winners will appear in the April 2005 issue of INTERNET TELEPHONY® magazine.

About XMediusFAX SP

XMediusFAX SP is the industry's first T.38, multi-tenant Fax Over IP solution that integrates seamlessly with leading IP telephony technologies from Cisco, 3Com/AudioCodes, and Alcatel, among others. It is designed specifically for service providers and large enterprises requiring support for multiple T1s on a single server. The product partitions networks into hundreds of virtual fax servers, each with their own settings, queues, and administrators. Users can send and receive faxes directly from Microsoft Outlook, an SMTP email client, desktop application, or any T.37-compliant multifunction device (MFD).

XMediusFAX is an essential building block for a truly comprehensive unified messaging system. It enables corporations to further reap the real ROI benefits of VoIP deployment, since faxes will now also share a common inbox, along with email data and voicemail.

The XMediusFAX technology is the industry's first T.38 FoIP solution with dual capabilities of operating either boardless - by leveraging VoIP gateways and IP PBXs to reduce costs and enable a true VoIP implementation - or with fax boards, to preserve existing telecom architecture. XMediusFAX has garnered numerous product awards.

XMediusFAX, runs on Windows 2000 and 2003, and is available in Enterprise, Express and Service Provider (EE, X and SP) editions. Various email messaging platforms, including Microsoft Exchange 2000 and 2003, Lotus Notes, SAP and Cisco Unity, are supported. Key features include support for H.323 and SIP, SMTP/POP3 and XML gateways, Least Cost Routing (LCR), G4 (Group 4) TIF file format, redundancy for mission critical applications, Active Directory synchronization, MMC Snap-in, HTML email notification, an API module, SPAM filtering, and a client for advanced fax functionalities.

About Interstar Technologies Inc.

Privately-held Interstar Technologies pioneered the fax server revolution in 1996 with its LightningFAX® software. It then reinvented the fax server in 2002 with XMediusFAX®, the industry's first boardless, T.38 IP fax server solution for enterprises and service providers. With thousands of systems installed in more than 40 countries, Interstar is committed to providing world-class, electronic messaging technology to enterprise markets of all sizes, financial institutions, and governments.

Headquartered in Montreal, Canada, Interstar Technologies maintains partnerships with Cisco Systems, Groupe SAGEM, Bell Canada, 3Com, Eicon Networks, Microsoft, Pitney Bowes, IBM, HP, Lotus, SAP, Onset Technology, Brooktrout and Artisoft. Its award-winning solutions for Microsoft Windows are distributed worldwide through a global network of resellers, system integrators and OEM partners. For more information, visit the Interstar website at www.faxserver.com.

About TMC

Technology Marketing Corporation (TMC) publishes two print magazines: Customer Interaction Solutions, and Internet Telephony; five digital publications, SIP Magazine, Speech-World, WiFi Telephony Magazine, VoIP Developer, WiMAX Magazine; and the online publications TMCnet.com, Planet PDA Magazine, WiFi Revolution, Alternative Power and BiometriTech. TMC is also the first publisher to test new products in its own on-site laboratories, TMC Labs. TMC also produces The VoIP Developer Conference, Speech-World Conference, IP Contact Center Summit and The Global Call Center Outsourcing Summit. TMCnet.com publishes more than 25 topical online newsletters. For more information about TMC, visit its Web site at www.tmcnet.com.
