

Interstar unveils XTrax FoIP workflow tracking software for VoIP networks

Interstar's XTrax™ fax tracking software deployed with boardless XMediusFAX® T.38 Fax over IP (FoIP) fax server software provides the healthcare industry with a cost-effective remedy for the challenges of efficient fax workflow management and HIPAA compliance, further leveraging VoIP investments.

Montreal, Canada, February 6, 2006

Interstar Technologies (www.faxserver.com), the global leader in IP fax since 2002, will be launching its XTraxT T.38 Fax over IP (FoIP) workflow tracking software at the 2006 HIMSS Annual Conference & Exhibition (Booth # 3351), a premier healthcare IT conference, being held February 12-16, at the San Diego Convention Center in California (<http://www.himss.org>).

Interstar's XTrax T.38 IP fax workflow tracking software creates an official audit trail that facilitates compliance with HIPAA (Health Insurance Portability and Accountability Act), which governs the security, accountability and confidentiality of healthcare patient and institutional data. XTrax is a user-friendly software for viewing, searching, processing, OCR scanning, routing, archiving, and retrieval of faxes.

XTrax is deployed with Interstar's pioneer boardless T.38 FoIP solution, XMediusFAX®, which integrates seamlessly with the leading VoIP gateways of leaders such as Cisco, 3Com, Alcatel, AudioCodes, and Vegastream. In addition to leveraging VoIP infrastructures and facilitating HIPAA compliance, the combination of Interstar's XTrax IP fax tracker and XMediusFAX boardless FoIP fax server software enables healthcare providers to improve patient care and resource management.

"XTrax fax workflow support is a cost-effective remedy for the challenges surrounding fax and data transmission as it pertains to patient safety, security, electronic health records, and clinical systems - all critical issues being covered at the HIMSS Annual Conference & Exhibition," said Martin Demers, President and CEO of Interstar Technologies. "It's the perfect low-TCO (Total Cost of Ownership) companion for our boardless XMediusFAX T.38 FoIP solution."

About XTrax™ T.38 FoIP fax workflow support

Installed as a client on each workstation, or accessed through a thin client, XTrax is used in conjunction with Interstar's XMediusFAX T.38 Fax over IP

(FoIP) fax server system and Microsoft SQL Server. XTrax enables system administrators, group administrators and staff to track and manage all inbound faxes. The XTrax Browser component searches new and processed faxes, and consults the audit tracking logs for each fax. The XTrax Viewer component opens and processes faxes as part of a workflow. Whether the user is a healthcare worker exchanging patient records, or an agent processing healthcare claims and payments, XTrax enables:

- Fax viewing, searching, rerouting, forwarding and deletion
- Archiving of faxes for easy retrieval

Fax annotation using: stamped comments, highlights, pen marks, and action flags, and much more. Addition details on other XTrax features available at: www.faxserver.com/fax-server-software/xtrax/index.htm

About HIMSS

HIMSS (Healthcare Information and Management Systems Society) is the healthcare industry's membership organization exclusively focused on providing leadership for the optimal use of healthcare information technology and management systems for the betterment of human health. Visit www.himss.org for more information.

About Interstar Technologies

As the world pioneer of boardless T.38 Fax over IP (FoIP) fax server solutions for VoIP networks, Interstar Technologies is "Changing the Way You Fax" everywhere. Recognized for its award-winning XMediusFAX® (boardless T.38 FoIP) and LightningFAX® (for legacy fax boards) fax server software, Interstar Technologies caters to enterprises, government entities, and service providers of all sizes. With thousands of systems installed in more than 40 countries, Interstar is committed to providing world-class FoIP solutions. Interstar dominates the worldwide IP fax server market for the 4th consecutive year, leading with nearly 75% market share, per Davidson Consulting in a July 2005 study.

Interstar Technologies maintains partnerships with Cisco Systems, Avaya Inc., 3Com, AudioCodes, Vegastream, Bell Canada, Groupe SAGEM, Pitney Bowes, HP, IBM, Lotus, Microsoft, and SAP. Its fax server software solutions are distributed worldwide through a global network of business partners, system integrators and OEM partners. For more information, visit the Interstar website at www.faxserver.com.
