

XMediusFAX®

EXPRESS EDITION

BOARDLESS, T.38 FAX OVER IP SERVER

Now Everyone Can Benefit from a FoIP Solution!

Ideal for up to 100 users

XMediusFAX® is a fast, secure, and reliable IP fax server solution that has dominated the global FoIP market since 2002.¹ Its pioneering boardless (software-only) FoIP technology offers the most advanced T.38 FoIP integration for Cisco, Avaya, AudioCodes, and Alcatel VoIP platforms. XMediusFAX has won numerous awards in the IP telephony space.

Handles All Your Fax Needs

If you have up to 100 users and a VoIP network, XMediusFAX Express is the perfect solution for all your fax needs. XMediusFAX is our award-winning boardless Fax over IP (FoIP) server software – ideal for organizations requiring a software-only fax solution with up to 4 fax channels, email integration, and licensing for a small to medium-sized user group.

Requires No Hardware

XMediusFAX Express requires no hardware, and installs quickly and easily on Windows Vista or 2003/2000. This fax server solution is the perfect companion for a Voice over IP (VoIP) deployment, allowing you to convert all circuits to IP, including fax.

Provides Substantial ROI

Simple to use and administer, XMediusFAX Express yields considerable ROI, since expensive fax boards and dedicated analog lines are not required. It typically pays for itself in 3 to 6 months.

Plugs into Your VoIP Network

XMediusFAX Express connects directly to leading VoIP gateways, such as those from Cisco, Avaya, AudioCodes, and Alcatel, leveraging your IP investment with our pioneering FoIP technology.

Opens Your Inbox to Fax

Our boardless fax server solution enables your users to send and receive faxes directly from their existing desktop email clients, such as Microsoft Outlook, or networked multifunction printers (MFPs) and digital copiers.

Increases Staff Productivity

XMediusFAX boosts productivity by 90% over traditional manual faxing, since users no longer need to make time-consuming trips to a fax machine.

Reduces Your Telecom Costs

XMediusFAX can reduce telecom costs by 40% or more over traditional faxing. In multi-branch organizations, long-distance fax charges are drastically reduced through XMediusFAX's built-in Least Cost Routing (LCR).

Faxes travel over the IP network until they reach the closest PSTN connection to their final destination – a fax machine or an MFP.

XMediusFAX eliminates costly analog phone lines, hardware, toners, maintenance and supplies. Organizations are saving tens of thousands of dollars a year with XMediusFAX.

Benefits

XMediusFAX adds the critical component of fax to your IP messaging infrastructure. Desktop faxing adds 25–40 minutes of productivity per employee per day.² Add a lower initial cost and higher ROI than legacy fax board solutions and your decision is easy.

Enjoy these benefits with our boardless FoIP solution:

- Easy integration
- Flexibility
- Reliability

XMediusFAX: Powered by the most advanced FoIP integration for these VoIP platforms:

Send fax like email . . .
Reliable, easy-to-use
IP fax server software.

Boardless FoIP.
No fax hardware required.

**BUILT FOR
LIGHTER FAX
USAGE**

XMediusFAX typically pays for itself within 3–6 months.

NEW IN XMEDIUSFAX EXPRESS

- **KEY ARCHITECTURAL ADVANCEMENTS:**
 - Open standards architecture and database
 - Centralized Microsoft Management Console (MMC) administration
 - Easy upgrade path to XMediusFAX Enterprise or SP
- **ENHANCED DIRECTORY INTEGRATION:** Supports LDAP-based directories such as Active Directory without database schema modifications
- **MULTILINGUAL SUPPORT:** Enhanced user interface options in English, French, German, Italian, Portuguese and Spanish

EASY INTEGRATION

XMediusFAX easily integrates with your existing email system to enable users to send and receive faxes from their desktops.

FLEXIBILITY

A host of administration features like billing codes and remote monitoring give you powerful control over transmission, logging, delivery and notification of faxes.

Users can send individual faxes or fax broadcasts from their familiar email programs, or the feature-rich XMediusFAX SendFAX Client. Faxes can be sent immediately or scheduled.

RELIABILITY

Sagem-Interstar pioneered boardless FoIP technology and remains the industry leader. Its team of experienced support professionals are second to none.

VOIP GATEWAY SUPPORT

- Cisco Systems 1700, 1800, 2600, 2800, 3600, 3700, 3800, 7200, 7300, and 7600 CMM Series; and AS5300, AS5400 and AS5800 Series
- Avaya G700, G650, G350 Media Gateways

- AudioCodes Mediant 2000 and TP-260 Digital; MP-112, MP-114, MP-118, and MP-124D Analog
- Alcatel OmniPCX Enterprise 5.1/6.0, OmniPCX 4400

IP PROTOCOL SUPPORT

- T.38, SIP, H.323, and MGCP with Cisco Unified Communications Manager (CallManager) 4.2(3)

EMAIL SERVER SUPPORT

- Microsoft Exchange 2007/2003/2000/5.5
- SMTP-compliant mail servers

AUTOMATIC ROUTING

- Methods: DID, DNIS, ANI, CSID, Channel and LDAP
- Destinations: user, email, printer, folder

ADMINISTRATIVE

- Active Directory/Microsoft Exchange integration
- Remote monitoring and user management
- Support for T.38 ECM (Error Correction Mode)
- Graphical fax port monitor
- Exportable transaction logs

SERVER CONVERSION OF DOCUMENTS

- Adobe PDF, Microsoft Word, PowerPoint, Excel
- HTML, JPEG, GIF and RTF
